

McDonald Incubators

One piece molded design allows a smooth interior – no lips or gaps for eggs to get caught on or bacteria to grow. It is a high –impact , all plastic egg hatching system . Simply direct about 4 liters/minute of water (depending on the weight of the eggs) into the center . The eggs will be uniformly rotated.

The fish hatching jar comes with a top screen that prevents the loss of eggs . When the fish hatch , remove the screen to let the fish swim out. Use it for trout , salmon, hybrid striped bass, catfish , tilapia and many others.

Spesifications		
Jar	Height	18'' (45.8 cm)
	Volume	6.86 l
	Diameter	15.9 cm
Feeder Tube	Height	18'' (45.8 cm)
	Diameter	1.25'' (3 cm)
Filter Screen	Diameter	5.63''(14.3 cm)
Spout	Lenght	3''(7.5 cm)
	Width	2''(5.3 cm)
	Depth at Tip	1.5''(4 cm)
Total Weight	1,135 g
